Statement

Determination of the states of offspring of a couple where on spouses scheduled Cast

The crucial test to determine the status of offspring of a couple where one of the spouses is a member of a Scheduled Castes is whether a child born out of such a wedlock has been arcepted by the Scheduled Caste community as a member of their community and has been brought up in that surrounding and in that community or not. The nexus between the child and the community or class or caste is a real test irrespective of the fact whether the accommodating class or caste or community is Scheduled Casts community or a caste Hindu community. Even if the mother of the child is a member of the Scheduled Caste community, it is possible that the child is accepted by the community of his father and brought up in the surroundings of the father's relations. In that case, such a child cannot be treated as a member of the Scheduled Caste community and cannot set any benefit as such. Similarly when the mother belongs to sigher caste and the father is a Scheduled the father may remain away from the Scheduled Caste community and child may be brought up in a different surroundings under the fluence of his mother's relations and her community members, such cases also, the child cannot be said to be a member of the Scheduled Caste community. In the alternative, where the child irrespective of the fact whether the father or the mother is a member of Scheduled Caste community, is brought on in the Scheduled Caste community as a member of sun Gmmunity, then he has to be treated as a member of the Scheduled Caste community and would be entitled to receive benefits as such.

Above is the general position. How ever, each case has to be examined in the light of the circumstances prevalant in

that case and final decision has to be taken thereon.
